Experience/Projects

HuskyBanks
Sep 2019 – March 2020

A case study on creating an app for financially stressed college students.

- Collaborated in a group of 5 to design a simplified budgeting app with a less intimidating and fun interactive experience.
- Conducted UX research to gather a general understanding of what assistance students need financially.
- Created high-fidelity wireframes to be tested by users to note the most common behavior and reactions regarding the aesthetics and content of the app.
- Took part in creating and delivering a presentation to a cohort of 33 students including a best-practices guide resulting in positive feedback from classmates

Digitizing By Gwen
April 2019 – June 2019

A website advertising digitizing photos and videos.

- Collaborated in a group of 5 to develop a website including the interest design of the client as well as efficient navigation. As well as consistently assured with the rest of the members about the agreed idea of the website.
- Tested users by sorting cards to see what was the most intuitive the user will navigate themselves throughout the website
- Used Adobe Illustrator to create Celtic knots to be an interactive clickable feature throughout the website.
- Took part in using HTML and CSS to create the front-end of the website.
